- Spring Suspension	- Powder Coated Paint	- Wood Floor
- Spare Tire Mount	- 7-Way Plug	- LED Lighting

### Description

This is a 25ft (205) pierced frame deckover trailer with spring assisted full surface flip over bobcat ramps.

#### Features

Standard torque tube system eliminates any unwanted side-to-side twist! If you've ever pulled a trailer without these, you will notice the difference immediately on an H&H.

3" channel steel cross members full weld conjoined to frame on 16" centers. Semi-trailer style cross members give you the ultimate trailer.

12" wide flange 14lb/ft I-beam frame and neck - built for heavy service.

Standard drop-down nose on neck eliminates excessive coupler flex under heavy load...this eliminates that "jerking" sensation you've felt from the driver's seat on other trailers.

2 5/16" adjustable height gooseneck coupler with heavier load ratings.

Custom cut and fitted bi-fold high tensile strength steel neck gussets.

Standard chain storage tray included on every trailer at front of deck.

Standard bed access steps and grab handles on either side of neck.

10 gauge stake pockets with inverted rub rails. Twice the thickness and twice the weight of our competition!

Treated 2x8 wood flooring with a Supplier's lifetime warranty against rot.

Tandem 7000lb slipper sprung axles with 4-wheel brakes. Spring axles allow for better off-road weight handling. 14000lb GVWR.

Heavier 80 Series radial tires carry more weight than any other E rated tire on the market.

LED, DOT compliant lighting and break-away brake actuation system.

Dual 12000lb spring loaded drop-leg jack standard. Spring loaded foot retracts automatically for easy stowing.  
35' and 40' lengths include bridge under frame option standard.  
Powder Coat Steel Finish.
